

# PROJECT CONTEXT

Pedestrian and cycling connections and the passive enjoyment of our estuary are important to the residents of the Comox Valley. Completing the Courtenay Riverside Trail, connecting downtown Courtenay to Royston, is a key component to increasing our valued trail networks. The project is split into three phases as shown here:

- **PHASE 1** will be constructed on a City owned parcel of land that is a former rail corridor.
- **PHASE 2** will continue along the corridor which extends to a park space. Phase 2 will not be constructed until an exit is acquired at Marriott Road.
- **PHASE 3** is undetermined and will not proceed until a route is established.
